To Whom It May Concern

I am writing to recommend Farhan Sakib Uddin for the master's program in your institution. I had the opportunity of knowing Farhan as a student during his thesis under my supervision in which he had been able to achieve A+ Marks >=90.

I feel confident that he will continue to succeed in his studies as he is a dedicated student and thus far his grades have been exemplary. Farhan distinguished himself by submitting an exceptionally well-researched and exciting thesis. His drives and abilities will truly be an asset to your establishment, and he will progress and excel in academic and professional level.

In summary, Farhan is hard-working, intelligent, and enthusiastic about learning. More importantly, based on the above qualification, he is a multi-talented student who will make an essential contribution to any research problem if he undertakes. I strongly recommend him for admission to your graduate program evaluating his superior qualities. I also recommend him for any possible financial assistance in the form of a scholarship.

If you have any questions regarding this recommendation, please do not hesitate to contact me.

I wish him a healthy and successful career.

Letter of Recommendation

I am writing this letter in support Farhan Sakib Uddin, ID:18-37509-1 who was a student of Bachelor of Science in Computer Science Engineering program in American International University Bangladesh (AIUB). I have found him to be an aspiring and sincere student. Sakib completed his Computer Fundamentals course, and Introduction to Database course under my supervision with a good grade.

He has an inquisitive mind and good interpretation abilities that will greatly facilitate any future research work undertaken. An intelligent and hardworking student, Sakib has a natural inclination for research. This inclination stems from him curious bent of mind and a nature for questioning. He has the ability to voice him ideas clearly, which greatly enhances him expressiveness in solving doubts when approached by fellow students.

At a personal level, Sakib is a well-disciplined, industrious student with a pleasant personality. He is unstinting in him efforts to keep abreast with the latest technologies, indefatigable in showing the applications of theory to practice in the Laboratory.

In my opinion he has rich blend of creativity, temperament and discipline required for a person who desires a career in Computer Science Engineering, and I strongly recommend him to the Master's program in your esteemed university with possible financial assistance.

STATEMENT OF PURPOSE

Academic Background

My name is Farhan Sakib Uddin and I am planning to pursue Masters of Business Information System from Australian Institute of Higher Education and then hope to develop a promising career in Data Analytics after my studies. I have completed my Bachelor of Science in Computer Science and Engineering from American International University- Bangladesh.

Reasons for choosing Australia

One of my major reasons for choosing to study in Australia is because all the Universities and Colleges are internationally recognized and appreciated for their standard of education and for holding good positions on university's guide list worldwide. This also includes the existence of cultural diversity as students come from all over the world. Additionally, sightseeing and traveling opportunities that can help in exploring myself horizon are available in the Australia. In addition, the environment in most Australian universities are friendly, which is very helpful for international students.

Reasons of selecting Australian Institute of Higher Education

Australian Institute of Higher Education has an excellent reputation for academic excellence and quality with hundreds of courses available for students to choose from, as well as excellent teaching and learning facilities, especially for students wishing to obtain a Masters of Business Information System. The university is also very mixed and multi-cultural, which would be perfect for a student like me that will be coming from Asia. Interacting with individuals from diverse nation will help me build a good network and it will also help me to build a strong communication and will help to grow my interpersonal skills.

How my course will benefit me Career

As a developing country, Bangladesh is having an enormous expansion in its IT and industrialized sectors so, lots of job opportunities are waiting for the Business Information System graduates, as graduates will have proper knowledge in both business and IT. As such, graduates from Business Information System are highly demandable both in the private and public sectors. Getting a job in Bangladesh after my graduation with a degree from Australia would not pose any challenge. Also, graduates from Australian universities are highly favored and stand to command higher salaries than those who graduate from universities within Bangladesh. From doing Masters in Business Information System, I will be able to get deep knowledge on information technology skills, business process optimization, data analysis and many more valuable skills in today's technology-driven business world.

Future career plans

In recent years, the IT sector in Bangladesh went through a remarkable transformation. The opportunity to get employed in relevant fields in this fast-changing job market has increased drastically. Although with the advancement of developments the criteria of many employers now include having the most skillful candidates with internationally recognized degree. My plan is to complete my Master's in Business Information System from Australian Institute of Higher Education. After that I will come back to Bangladesh and implement the knowledge and skills that I will acquire from my studies in Australian Institute of Higher Education to set up new business methods to improve the environment and the economy of my country, Bangladesh. The theoretical knowledge, hands-on-hands learning and the strong connectivity that I've nurtured from Australia which will help me gradually make my way to become a successful person.

With the right skills-set and expertise, I will apply for jobs in the Public/Private Sectors, Non-government organizations or renowned Multinational Companies (MNCs) related to its sectors. The salary for the top tier position in these companies are quite impressive from the starting level and would help me settle comfortably with my family.

I am looking forward to joining AIHE family soon.

Yours sincerely,

Farhan Sakib Uddin
